News From Your TOWN HALL

Making the tax roll for Belle Glade at this particular time is of the utmost importance. The City Fathers see the need of more revenue with things as they are; conversation is being had concerning a sewerage system, which takes money.

The basis of borrowing money is the security for the money, both the appraised value of the taxable property, and the amount of tax that will be assessed and collected. Determining this is no small job and demands time.

The City Clerk can do the job, but he can't do it as an incidental to being Clerk; he must have time and thought, and to do it right. We're going to be able to borrow money in proportion to the degree of our city government.

The tax roll here is a bit of a misnomer at present, un- equal, and reflects neglect. It will return to the City in exact proportion to the thought and effort put in preparing it. It does not at present reflect equalized, or proper values nor revenue-producing potentiality.

## JUNIS HARRIS

(Continued from page one)  
their pleas being given any serious consideration, which it deserved.

At the annual meeting of the Belle Glade Chamber of Commerce at the City Hall Monday night, in substance the above report was made by President Campbell, supported by the other members of the committee.

Mr. Campbell in his retiring address as president of the Chamber, voiced the opinion that if the Glades, and Belle Glade in particular, desired any political standing and power, we would have to mass more voting power, for it was apparent that public elected bodies cut their wood according to the number of votes which could be produced. That while Belle Glade was the second largest city in the county, yet its voting strength was woefully low, because there were so many citizens, white ones in particular, who fail to register for state, county and city elections. He urged that steps be taken by the civic clubs to put on a registration campaign at once, so that we might have something to say in a political manner, and get every eligible voter registered. The Chamber endorsed this idea, and machinery to bring it about will be evolved and announced.

When the members of the Chamber came to elect a successor to Mr. Campbell, who had positively refused a re-election, after a bit of canvassing, Junius Harris, insurance man and a returned veteran, was unanimously crowned with that honored position. The secretary and treasurer are elected by the Board of Directors, so will be chosen upon the reorganization of that body. New directors chosen to serve three years are "Hap" Parsons, H. L. Haney, Shirley Connell and L. E. Will. The retiring directors are J. O. Jameson, George Tedder and C. E. Riedel.

The secretary read the minutes of the last annual meeting of the Chamber and also the financial report for the year

ending December 31, 1945, and both were approved.

The members recommended that the constitution be changed so that nominations could be made by a special nominating committee for report to the Board 30 days prior to the annual meeting, so that study might be made on the selections, followed by later nominations from the floor, if required.

# LET'S TAKE STOCK NOW

Everybody wants goods.

Manufacturers want to make them for you.

Yet months after the war's end, you still find it difficult to get many of the things you want and should have.

So, isn't this the time for all of us to take stock . . . to learn a lesson . . . to find out, if we can, what will cure the troubles we are having and prevent their recurrence?

Let's look ahead and agree on a program that will insure the full production everybody agrees is the real answer to most of our problems.

Suppose we begin by taking a good look at three roadblocks to prosperity...

### STRIKES

Whatever their justice or injustice, strikes paralyze production, force people to use up their savings, and result in losses that can never be made up.

### PRICE CEILINGS

Full production isn't possible when industry suffers losses because of rising costs and frozen prices. Price

ceilings limit production — goods just don't get made.

### GOVERNMENT SPENDING

Continued huge government spending means continued high taxes. High taxes discourage production, hinder the creation of jobs, and leave you less to spend.

### ISN'T THIS THE WAY?

The people, through Congress, can remove these roadblocks in the long-range interests of all...

By establishing a labor policy that will treat labor and management exactly alike, and above all be fair to the public;

By removing the shackles of price control on manufactured goods;

By cutting down on government spending now and balancing the Federal budget by the 1947 fiscal year at a level of income and outgo that taxpayers can stand.

Do you believe this program is in the public interest?

Your Representatives in Congress are the only ones that can put it into effect. Tell them how you feel about it.

## A Message Concerning Telephones For Farmers

One of our most important peacetime activities, supplying telephones in farm areas, has been resumed and is being expanded as rapidly as equipment and materials are available.

Considerable time and equipment will be required to build the lines and install the facilities necessary to extend service to all areas.

You will be glad to know, however, that we have started our rural development activities and are expanding the work to bring telephones to additional farm communities just as fast as we can.

Spessard L. Holland, candidate for United States Senator and Florida war time governor, will launch a speaking tour of the state at 8 p.m. today in Bartow, his home town.

The first candidate in the race to make known his intentions of seeking the senatorship, Holland formally announced for the office last October 31, after Senator Charles O. Andrews announced he would retire.

His announcement followed repeated urgings by newspapers and individuals that he become a candidate for the high post. Holland's itinerary for the first ten days of the tour will take him on a swing through Central, North and West Florida, as far west as Apalachicola and Vevahatcha.

He will speak at 5 p.m. tomorrow in the park at Winter Haven, and at 7:30 p.m. in Munn Park, Lakeland, Polk county cities which are giving him warm support. He will visit other Polk communities later in the campaign.

From Polk county, Holland will go to Jefferson county, speaking in that county at Monticello, the county seat, at 4 p.m. He will make an 8 p.m. address the same day at Quincy, Gadsden county seat.

Tuesday, he will make a 3:30 p.m. address at Bristol, and a night address at Tallahassee, where he expects to get many

## CHIEF PAYNE

(Continued from page one) rooming house and found the woman very ill with three little children sleeping with her on a pallet. He thought she was suffering from TB, called up the Okeechobee Camp and arranged for her to be taken to the clinic there. They pronounced it as he had feared and also examined the children, none of whom, luckily, were as yet affected.

He was directed to take the woman to the Government Hospital for X-ray and Dr. Livingston pronounced it TB in the last stages, and the patient was perhaps six weeks to live. To his consternation, however, she was refused hospitalization on the grounds that they had no place to take care of such a patient. What to do with her? He did not know! What to do with the children? Again he did not know.

He then took the matter up with the Red Cross and Welfare organizations and reports that neither organization would accept responsibility, either for the care of the mother or of the children. Then he took up the matter with the South Bay town council and they advised him to get in touch with Dr. W. E. VanLandingham, county health physician. He did so, but Dr. VanLandingham stated that he had no funds and no place to take care of the case. Next he called Paul Rardin, the county commissioner. Same story. Sorry, but no way to take care of the case, no county funds for the purpose, no contagious ward for TB patients. This is but one of a number of similar cases and no solution in sight.

Chief Payne has taken care of the children himself, but no place has been found for the

## CHURCHES OF CHRIST,

SCIENTIST  
"MAN," is the subject of the Lesson-Sermon which will be read in Churches of Christ, Scientist, throughout the world on Sunday, March 10.

The Golden Text is: "The steps of a good man are ordered by the Lord; and he delighteth in his way" (Ps. 37:23). Among the citations which comprise the Lesson-Sermon is the following from the Bible: "And God said, Let us make man in our image, after our likeness: So God created man in his own image, in the image of God created he him; male and female created he them" (Gen. 1:26-27).

The Lesson-Sermon also includes the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Man, made in His likeness, possesses and reflects God's dominion over all the earth. Man and woman as co-existent and eternal with God forever reflect, in glorified quality, the infinite Father-Mother God. To emphasize this momentous thought, it is repeated that God made man in His own image, to reflect the divine Spirit. It follows that man is a generic term" (p. 516:19,22, 27-30).

county, as counties go, he Palm Beach county is a rich county, as counties go, so he pointed out. Thousands of the tax dollars have gone to pay for the Government Migratory hospital and its upkeep; thousands of dollars have also gone to support the hospital in West Palm Beach, and donations to the Red Cross and other organized charities, by residents of the Glades, run into many thousands. Why, he asked, is there no contagious ward to take care of TB patients that are dying over the county, and infecting others with this dread disease?

He is a police officer and not a health officer, but he has this problem on his hands. What is he going to do? Will the good people of the Glades sit still and do nothing to alleviate this, and similar cases that are threatening the health of everyone living in the Glades, and all the while contribute heavily to the so-called organized "charity" that cannot take it upon itself to make easier the lot of a dying woman with three children unable to care for themselves?

## Our Policy on NEW CAR ORDERS

In accordance with fair procedure

We are now accepting orders for earliest possible delivery of new cars. However, as you know, there are not enough new cars for all who want them. Therefore, we want to make a clear statement of our policy . . . so that everyone will know exactly how we are handling orders for and delivery of new cars during the current shortage period.

- 1 We intend to fill orders for new cars in the order in which they are received. There are two exceptions to this basic rule
- 2 We will definitely reserve a percentage of our cars for those who served in the Armed Forces. We feel sure that all our customers will agree with the justice of this exception.
- 3 If definite need for a new car is a factor, we will, in the public interest, determine such cases on the basis of the now abolished, but publicly accepted, OPA priority lists.

This policy is in your interest. We are following it because we want to serve you fairly and well today as in the past. The Ford Motor Company and we ourselves are making every effort to deliver your new car promptly and honestly.

### OBSERVATIONS

Continued from page 1  
the sugar situation should be materially bettered, so we could all have two spoonful of sweetening for our cup of coffee.

Isn't it a bit of irony, to see a load of carrots trucked in from Texas, to Belle Glade, for resale to northern produce buyers? That is what occurred one day last week.

E. L. Borchardt, who has been experimenting with carrots on his farm this season, is more than happy over the returns he has secured, stating that this crop has been the best yielder and money income crop he has this year. So pleased is he with his venture, he plans to make extensive plantings next season. These carrots are topped, washed and sorted as to size, and then packed in web bags of 50 pounds weight. They are excellent in size and form, and true to the demands of the produce men and users as to texture, color and ring formations.

Mr. Borchardt also tried out

a patch of onions, to provide fresh onion bunches, and he reports this venture was also successful, all he could produce being snapped up quickly by buyers. He will grow several acres next season, as well as some of the large type of onions.

Reports released from the state capital for liquor and cigarette collections for the eight months of the present fiscal year, show collections of \$22,103,620, or nine and one-half millions more than all of the previous year. This indicates that there sure must be a sizeable use of beverages and tobacco in the state. Indications are that the total collection for the year will run well toward thirty million. Gasoline collections show even a larger income.

In and around the Fears hotel lobby, where I live, the Judge gets into a lot of interesting discussions and kiddings, but one of the funniest ones that ever occurred to me came on Saturday morning. On Friday night my wife came down from St. Cloud to spend the week end with me. When the maid went to clean up the room, she found a woman asleep in my bed. She at once hurried down to Martha Daniels, the hotel manager, and reported this way: "Wife, Mrs. Daniels, the judge done gone and picked himself up a woman and she is asleep in his bed." When she was told the truth, Lillie remarked, "My God, I forgot to put clean linen on that bed yesterday."

For the first time in five years, tourists from Warren and Trumbull counties, Ohio, gathered at the Masonic dining room in Ft. Lauderdale for their annual gathering and 150 guests enjoyed a wonderful visit and abundant dinner. The writer and his wife had an excellent time visiting with their former friends. Thanks to a generous gift of pascal celery from the Borchards packing house, and radishes and chihili from Graber and Sons, the party enjoyed to the limit some of the fruits of the Everglades, and raved about the excellence of the products. Thus did the Glades get some worthwhile advertising.

The Florida straw hat season is now on, and the styles displayed in local store windows indicate that the men are to

have some nifty styles from which to choose their headgear.

People who may be touring the state next year, down both the east and west sides of the lake, are not going to miss the route to Miami and Ft. Lauderdale, at South Bay, for that junction point is getting to be a favorite service station location. There are already three such established there and a fourth under construction. A year's time is going to make a considerable change in the business house topography of that junction, for in addition to the service stations, there will be two eating places and a liquor store.

Merchants report that it is more difficult now to receive consignments of goods for sale than during the war, and that many stocks are getting mighty low and difficult to replace. One of the items, of all else, is a shortage of face towel and

toilet papers, which just ain't any more.

Pastor Hatch, of the Seventh Day Adventist church, is a pretty good sky-pilot, while on terra firma, but he is not satisfied with that alone, for now under the tutelage of Pilot Cherry, he is learning to fly a plane, and is proving a most adept student.
